EDUCATION

Boston University **Online**
Master of Computer Science and Artificial Intelligence Expected May 2028
Relevant Coursework:
Applied Machine Learning, Cloud Computing, GPU Computing for Data and Cloud Applications, Scalable Data Analytics Systems

Lehman College (CUNY) **Bronx, NY**
Bachelor of Science in Computer Science January 2025
Relevant Coursework:
Data Structures and Algorithms (Java), Java Programming, Web Development, iOS Mobile Development

PROJECTS

EmployeeHub | *Java, Spring Boot, React, TypeScript, PostgreSQL, Claude API* GitHub
- Built a full-stack employee app (Spring Boot, React, PostgreSQL, Docker) with JWT login and role-based access.
- Added AI search (Claude API) that turns plain-English questions into validated, permission-checked filters.
- Kept employee data out of AI prompts and built answers from real query results, so the AI cannot invent facts.
- Wrote 40+ JUnit tests (run in CI) and 25 pytest API tests covering auth, CRUD, and AI failures.

PlanWise | *Java, Spring Boot, React, PostgreSQL, OpenAI API* GitHub
- Built a pay-over-time app (Spring Boot, React, PostgreSQL) showing installment plans, interest, and total cost upfront.
- Added an AI assistant (OpenAI API) that explains budget fit and rejects any number not calculated by the server.
- Wrote 80+ JUnit, Mockito, and Testcontainers tests for payment math, AI fallbacks, and data isolation in CI.

Community Health Resource Finder | *Next.js, React, TypeScript, SwiftUI, OpenAI API* GitHub
- Built a Next.js web app and SwiftUI iOS app on one API that find clinics, food banks, and shelters nationwide (23 tests).
- Pulled live OpenStreetMap data with retries and caching, falling back to Supabase listings during outages.
- Added an AI helper (OpenAI API) that turns plain requests into search filters and routes emergencies to 911 and 988.

Interactive World Map Dashboard | *Python, JavaScript, Leaflet, SwiftUI, Swift* GitHub
- Engineered a real-time dashboard visualizing **500+ geospatial data points** across earthquake, weather, and flight datasets.
- Built filtering, clustering, and heatmap views (JavaScript, Leaflet) for exploring large geographic datasets.
- Added validation and error handling to live API pipelines so the dashboard stays reliable when data is messy.

GamePulse | *React, JavaScript, CSS, ESPN API* GitHub
- Built a React app that follows live games across 8 sports and 15 leagues via the ESPN API, updating every 20 seconds.
- Turned key plays into push alerts and 280-character social posts, with a replay mode for finished games.

TECHNICAL SKILLS

- **Languages:** Java, Python, TypeScript, JavaScript, Swift, SQL, HTML/CSS, Bash
- **Frameworks & Technologies:** React, Spring Boot, Next.js, SwiftUI, UIKit, Flask, REST APIs, Supabase, PostgreSQL, Docker, pytest
- **AI & LLMs:** OpenAI API, Claude API, LLM integration, prompt design, structured outputs

EXPERIENCE

Fulfillment Expert **New York, NY**
Target June 2022 – Present
- Coordinated daily operations for a team of 30, maintaining performance goals in a high-volume, fast-paced environment.
- Trained and supported team members, improving operational consistency and productivity.

Research Project Assistant **New York, NY**
Lehman College April 2024 – January 2025
- Collaborated with faculty and student teams to develop, test, and improve iOS applications.
- Debugged and tested team-built iOS applications, validated features, and assisted with deployment across multiple environments.

CodePath Program **San Francisco, CA**
iOS Development Student February 2024 – May 2024
- Completed an intensive iOS development program focused on Swift, networking, and application architecture.
- Built interactive mobile applications with features like networking, data persistence, and user-friendly interfaces.

IT Help Desk Assistant **New York, NY**
Lehman College September 2021 – October 2023
- Resolved 10+ support tickets a week across hardware, software, and network issues on Windows and macOS.
- Documented recurring fixes for the team to speed up future troubleshooting, and configured desktop systems and user accounts.
